

Rise above the competition by empowering your end users

Dell Cloud Client Computing enables new mobile and remote work styles through desktop virtualization.

The new mobile workstyle is emerging within many organizations.

People want to work anywhere, anytime, with any device.

At work

On the go

In the field

To accommodate, organizations must embrace:

Remote access to applications

Managing a diverse array of devices

Offering content to mobile users

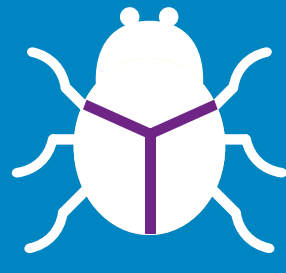

Securing devices and controlling usage

Data security has never been more important.

Dell Cloud Client Computing adds significant security benefits to an organization.

From 2005 to November 26, 2013 there were:

4,182

Personal records breaches ⁽¹⁾

547,049,306

Personal records exposed ⁽¹⁾

Organizations are under budget pressure.

They must enable their IT teams to work more efficiently.

Dell can help you to deploy virtual desktops with a simple and comprehensive end-to-end solution.

Comprehensive

Comprehensive and end-to-end with all the pieces, including all the required backend infrastructure, services, software, traditional clients and cloud clients, plus expert services. Dell is accountable for the entire solution.

20 Million+

thin clients sold ⁽²⁾

3 Million

supported desktops, laptops, virtual desktops from Dell Services ⁽²⁾

6x

faster deployment than DIY of virtual infrastructure ⁽²⁾

Partnerships with key virtual desktop technology providers:

Pre-built offerings:

86%

less time to deploy ⁽²⁾

99%

fewer steps than manual ⁽²⁾

Dell has the right services to help you.

Dell can help you architect a solution, deploy a solution, or even manage your virtual desktops – it's your choice depending on what help you need.
