

Fast Track Your Transformation to the Digital Workspace

With a flexible, scalable, end-to-end Dell EMC VxRail with VMware Horizon solution

Business doesn't stop when your employees leave the office.

To thrive, employees need digital workspaces—secure ways to work virtually, from anywhere, anytime, on any device.

29%

of millennials say they do their best work outside the office.¹

45%

of employees are frustrated by outdated technology.²

60%

of employees prefer to work on a personal device.³

Deploy an end-to-end digital-workspace solution for your business and obtain ...

Performance and scalability

Dell EMC VxRail Appliance solutions for virtual desktop infrastructure (VDI), powered by VMware's SDDC stack, provide extreme flexibility to granularly add capacity, performance and virtualized graphics on demand to meet your needs.

Security

Dell Data Protection | Threat Defense helps protect valuable intellectual property (IP) from loss and from threats within the data center.

Usability

Text and graphics load and refresh as fast as they do on a physical desktop. Additionally, users can enjoy rich collaboration with Skype for Business, access to multi-media monitors and HTML, and the ability to manipulate 3D graphics in real time.

Simplified management

Dell EMC VxRail Appliances are part of a complete VMware stack with just-in-time Horizon virtual desktops and apps, on premises or in the cloud, tightly integrated with VMware's software-defined data center (SDDC). Together with Wyse technology, management of users, data, images and endpoints is simplified and centralized.

True mobility

Wyse zero, thin and mobile thin clients, with support for Horizon Blast and PC over IP (PCoIP), give users rich access to apps, desktops and data across even the most challenging network conditions, at any time.

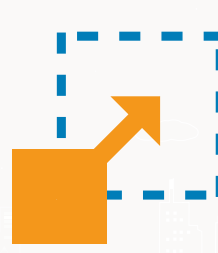

Complete services and support

With Dell EMC and Dell hardware, software, support, services and financial options, you get everything from one vendor, with streamlined deployment and management and a lower total cost of ownership (TCO).

30%

reduction in TCO compared to a build-it-yourself solution⁴

5 min.

to scale up by adding a new appliance⁴

1 click

to shut down a VM cluster⁴

One Vendor

The only end-to-end solution for the digital workspace, with one hand to shake and one bill to pay.
