

VMWARE vREALIZE NETWORK INSIGHT

Intelligent operations for networking and security for physical, virtual and cloud environments

At a glance

VMware vRealize® Network Insight™ delivers intelligent operations for software-defined networking and security. It helps optimize network performance and availability with converged visibility across virtual and physical networks, provides planning and recommendations for implementing micro-segmentation based security, and provides operational views to quickly and confidently manage and scale VMware NSX® deployment.

Key benefits

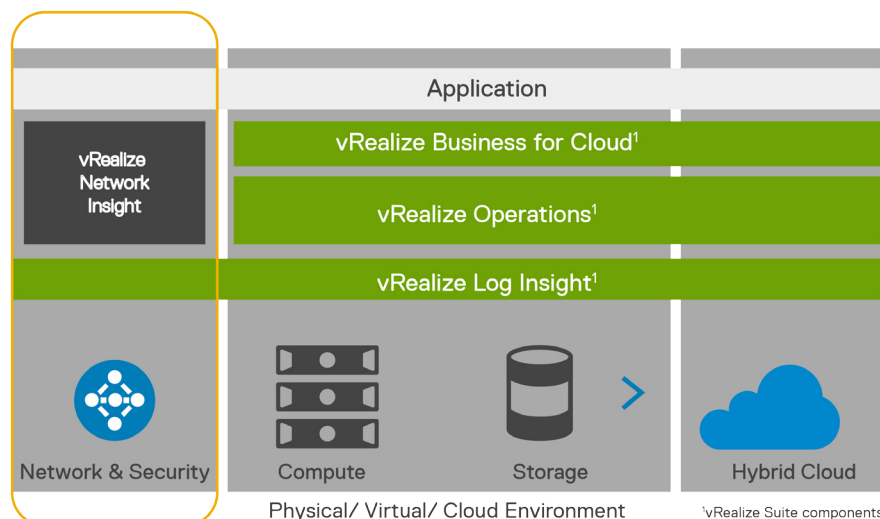

- East-west traffic analytics for security and micro-segmentation design
- Control and tracking to meet audit and compliance requirements for virtual distributed firewalls
- 360 Overlay-underlay visibility and topology mapping
- Extensive 3rd party physical switch integrations
- VXLAN to VLAN logical path mappings
- Advanced NSX Operations Management
- Natural language search and enhanced user experience for rapid troubleshooting

About VMware vRealize Network Insight

Today's tools for monitoring the dataflow for optimum East-West traffic can be challenging and time consuming since they involve manual processes. Niche and legacy network management tools do not provide converged visibility across virtual and physical networks in order to optimize performance. Customers need a simple easy to use management tool to troubleshoot and to get best practices compliance post-NSX deployment.

With vRealize Network Insight, you can take the guesswork out of deploying micro-segmentation with comprehensive netflow assessment to model security groups and firewall rules, actionable recommendations for implementing micro-segmentation and monitoring compliance postures over time. In addition, vRealize Network Insight can help you improve performance and availability with converged visibility across physical and virtual networks. You can also simplify NSX operations management with intuitive UI and natural language search to quickly pinpoint issues, and troubleshoot as well as get best practices deployment and compliance recommendations.

FIND OUT MORE

For information or to purchase VMware products, call 877-4-VMWARE (outside North America, +1-650-427-5000), visit <http://www.vmware.com/products> or search online for an authorized reseller in your area: [http:// partnerlocator.vmware.com/](http://partnerlocator.vmware.com/).

For detailed product specifications and system requirements, refer to the VMware NSX and vRealize Network Insight documentation www.vmware.com/vrealizenetworkinsight

Use Cases:

- Plan micro-segmentation deployment and ensure compliance
 - Comprehensive netflow assessment and analysis to model security groups and firewall rules

- Recommendations to make micro-segmentation easier to deploy
- Continuously monitor and audit compliance postures over time
- Optimize Network Performance with 360 visibility
 - Virtual and physical network topology mapping
 - Out of the box integrations with leading physical switch vendors
 - Performance optimization across overlay and underlay
- Ensure Health and Availability of NSX deployments
 - Intuitive UI, and natural language search to quickly pinpoint issues
 - Best practice compliance checking

Support and Professional Services

VMware offers global support and subscription (SnS) services to all vRealize Network Insight customers. For customers requiring additional services, VMware also offers professional services engagements on best practices and getting started with your deployment, both directly and through an extensive network of certified professionals: <http://www.vmware.com/services/>.
