Dell EMC Ready Bundle for SAP Landscapes

Streamline and consolidate SAP landscapes while preparing to adopt SAP S/4HANA

Customer Presentation

**DELL**EMC

Transforming IT to run SAP® Solutions

Enabling SAP can be difficult

72% of IT dollars go toward maintaining legacy applications – leaving only **28 percent** to modernize IT and SAP[1]

But modernization is essential

Consolidating onto modern infrastructure is required to put you on the road to adopting or expanding **SAP S/4HANA®**

And it will save you time in the long run

Modern infrastructure deployments result in **41%** less time "keeping the lights on" [1]

DELLEMC

Are you experiencing any of these challenges?

"Skyrocketing **complexity and costs**"	With limited budgets, most IT organizations tread water rather than innovate
"Running on slow, **inefficient** storage"	With 24/7 transaction processing and users demanding access to reporting, there's no time for storage bottlenecks
"Preparing for the digital economy and **modernizing** your SAP landscape"	As new solutions are introduced, the old are discontinued and unsupported —organizations that don't adapt and adopt quickly won't survive

DELLEMC

Modernize your SAP landscape with Dell EMC

Dell EMC has the knowledge, expertise and tools that make it easy for you to consolidate and modernize SAP landscapes

The Dell EMC Ready Bundle for SAP Landscapes has been carefully designed to**:**

Streamline and reduce costs	**Get faster results**	**Prepare for the digital economy**
Refresh outdated technology with the latest cost-effective innovations	Compute, networking and storage in a single solution reduces time-to-benefits	Chart a clear migration path to SAP S/4HANA®

D∕∕LLEMC

Streamline SAP Landscapes

The **Ready Bundle for SAP Landscapes** was designed to

- Streamline SAP landscapes to reduce complexity and maintenance costs

- While offering better performance and investment protection for your mission-critical data

Benefits

1 **Streamline and reduce costs** — Achieve greater performance agility and better efficiency – while lowering operating costs

2 **Faster results** — Leverage compute, networking and storage in a single solution to reduce time-to-benefits

3 **Prepare for the digital economy** — Enables new business processing and data-driving insights leveraging SAP software

Dell EMC Ready Bundle for SAP Landscapes

Dell EMC Ready Bundle for SAP Landscapes is offered with two compute options:

1 **Dell EMC PowerEdge R940**
[Up to four Intel Xeon® SP, up to 28 cores]

2 **Dell EMC PowerEdge R740xd**
[Up to two Intel Xeon® SP, up to 28 cores]

Configurations of Dell EMC Ready Bundle for SAP Landscapes include:

- **Dell EMC PowerEdge R940 Server**
  Designed to power mission-critical applications and real-time decisions

- **Dell EMC PowerEdge R740xd Server:**
  Maximum storage performance and scalability

- **Dell EMC VMAX All Flash arrays:**
  Combines ease of use, scalability, high performance, and data services

- **Dell EMC Connectrix DS Switch**
  Supports the SAP requirements of small to medium environments

- **Dell EMC Data Domain DD9300**
  Protection storage system offers performance and capacity

Please consult the Solution Overview for detailed configuration options

DELLEMC

Global enterprise Wihuri builds an SAP® S/4HANA environment on Dell EMC infrastructure

DELLEMC

Business need

Wihuri needed a reliable, cost-effective hardware platform to support a new SAP S/4HANA deployment.

Solution

- SAP S/4HANA
- Dell EMC™ PowerEdge™ R920 and R930 rack servers
- Dell Compellent SC2000 storage system
- VMware virtualization

Benefits

- Hardware consolidation resulted in savings on license costs, application support, and maintenance
- Achieved faster database recovery and faster adoption of IT innovations
- Gained more real-time business information and analytics for decision making
- Simplified running of applications and day-to-day use due to lightning-fast system speed
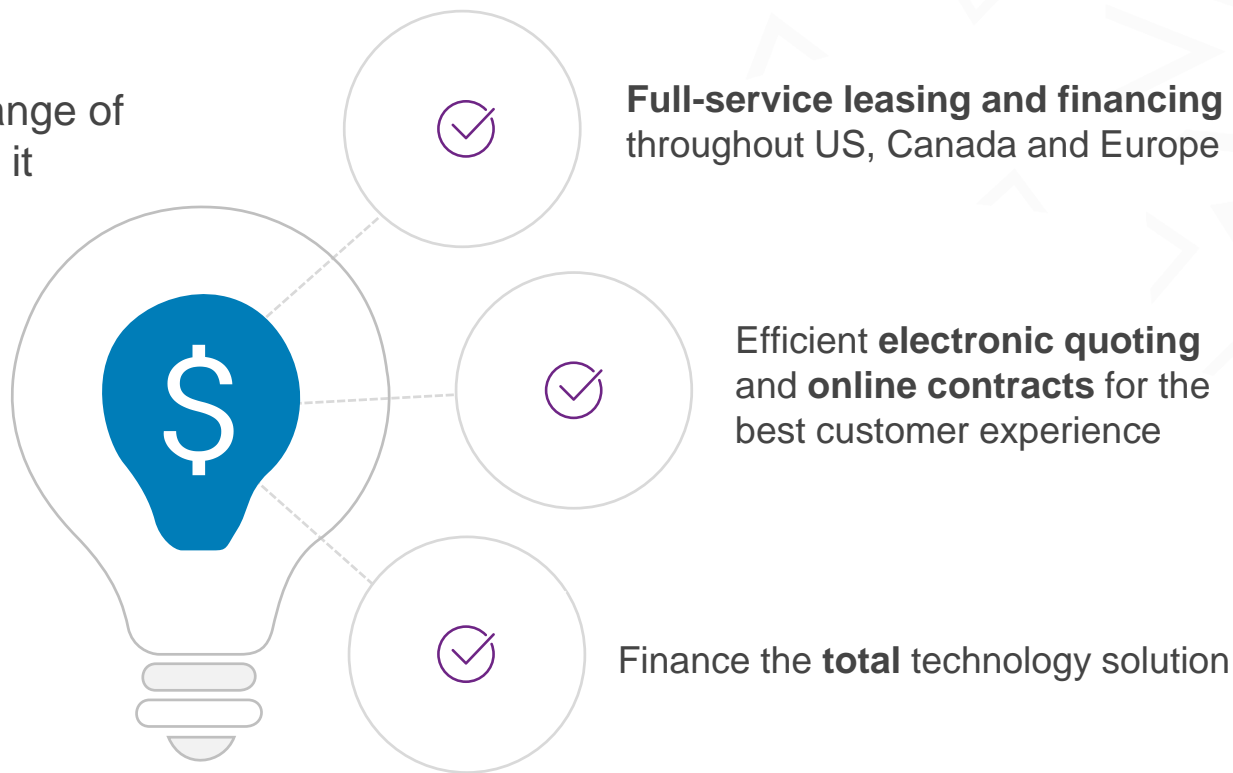

"Dell promised that they had a solution that is working, that will provide the performance we need, and that they had the capability to provide all the servers on time… And, actually, they did it much faster than on time. It was really fast; we had our servers in about a week. So Dell EMC showed the best delivery."

Juha-Matti Heino, Director of Corporate IT, Wihuri

WIHURI

Dell EMC financial services support the solution

Dell EMC offers a wide range of payment options to make it easier than ever to meet financing needs

Full-service leasing and financing throughout US, Canada and Europe

Efficient **electronic quoting** and **online contracts** for the best customer experience

Finance the **total** technology solution

D∕LLEMC

Dell EMC Professional Services

Solutions customized for your needs
Leverage on-site integration or application implementation with **Dell EMC Professional Services**

Support is always on for you
The Dell EMC Ready Bundle for SAP Landscapes comes with three years of award-winning **Dell EMC ProSupport** services and a three-year hardware warranty

Deployment assistance when you need it
You can trust Dell EMC to deploy the equipment in your data center, including network cabling, operating system, firmware and hypervisor with **Dell EMC ProDeploy**
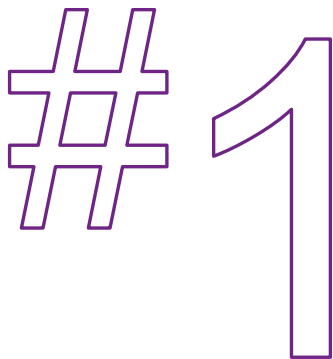

Dell EMC also offers all-flash deployment and support:

- Realize the **maximum return f**rom your VMAX All Flash

- Provides an **optimally deployed and supported solution** that delivers a trusted mission-critical architecture to deliver your business and technical needs

- **VMAX Services** include planning and design, implementation and installation, from data migration to support
